

D7.2: Initial Data Management Plan

Primary Author(s)	Alois Steiner, Marta Ribas
Lead Beneficiary	Virtual Vehicle Research GmbH (ViV)
Deliverable Type	DMP – Data Management Plan
Dissemination Level	SEN – Sensitive
Due Date	30.06.2023 (Month 6)
Pages	19
Version	3.0
Project Acronym	XL-Connect
Project Title	Large scale system approach for advanced charging solutions
Project Number	101056756
Project Coordinator	Virtual Vehicle Research GmbH (ViV) Alois Steiner (alois.steiner@v2c2.at)

**Funded by
the European Union**

1. Executive Summary

This document is the deliverable “D7.2 Initial Data Management Plan” of the project XL-Connect. This is the first version of a living document that will be adequately updated at least three times until the end of the project (D7.9 Revised Data Management Plan M18; D7.10 Revised Data Management Plan M36; D7.11 Revised Data Management Plan M42).

The Data Management Plan (DMP) is based on the Horizon Europe Programme Guide [3] as well as the Horizon Europe Data Management Template [4] and includes all datasets identified at the beginning of the project. It describes all the data that will be generated and/or gathered during the project, the standards that will be used, how the data will be exploited and shared (for verification and/or re-use), and how the data will be preserved.

The Project Coordinator of XL-Connect is responsible for this deliverable. The DMP defines and monitors the data management mechanisms that are linked to data requirements: collections, recording, organisations, storage, retrieval, consultation and use, including adaptation and alteration, permission and further access.

The data management of the project XL-Connect follows all relevant national and European Union (EU) legislation on data protection and management. All project partners shall comply with national and EU regulations, including General Data Protection Regulations (GDPR), (regulation (EU) 2016/679) [5].

This deliverable follows the guidelines for the F.A.I.R. (findable, accessible, interoperable and re-usable) Data Management set by the EC during Horizon 2020.
